

# Digital Business Cards

Promoting your brand virtually

# Why Digital?

Digital Business Cards give your clients all the info they need to make contact with you in any manner they choose.

Showcase your business by guiding users to the key elements on your website.

No more printing of business cards and brochures.

Clients can fill in forms directly through your digital business card.

Your digital business card is shareable on any social media or messaging platform. This alone increases your online presence significantly.

Real-time usage tracking provides insightful analytics to identify opportunities or weaknesses within your business model.

100% digital product, reduces carbon emissions and exponential costs.

# Benefits

## Memorable

Anywhere, any time, instantly

Convenient and effortless

Personalise your business card

## Analytics

Daily interactions

Most interest

Geographical locations

Social Media reports

## Marketing

Push Notifications

Events

Change contents of links

## Triple Bottom Line

Save the money you use to print brochures and business cards.

Allow your staff to transform with the digital world.

Save the planet by saving trees.

# Virtual Tours

A virtual tour is a marketing tool that can help bring new customers and clients to your business. It's also a "virtual reality" view of your business relayed in visual images that allow the viewer to be "right there" at your location. It's the best way to accurately show what your location really looks like. A tour is also a convenient sales tool that can be used to illustrate your business in a way still photography cannot.

## Connect

A user can make a "buyers" connection to your business when viewing a tour.

## Experience

Your clients get to experience your company as if they are already there.

## Convenience

The convenience of viewing a potential client in the comfort of your own home.
