

A close-up photograph of a person's hands holding a black headset with a microphone. The person is wearing a light-colored shirt. In the background, there is a laptop keyboard and a desk lamp with a white shade. The scene is lit with warm, golden light, suggesting a trading room or office environment.

## WHAT IS VOIP?

**VoIP stands for 'Voice over Internet Protocol' which is a technology that allows you to make phone calls using your Internet connection instead of your regular fixed line phone service. It is also referred to as Voice over IP. With VoIP you still simply pick up your phone, dial a number and talk. VoIP is simple and is for Businesses and Home users. It doesn't matter if the person you are calling has VoIP or not, this is all taken care of by us.**

**WE ARE A CORPORATE COMPANY THAT AIMS TO PROVIDE YOU WITH THE BEST SERVICE.**

## A COUPLE ADVANTAGES OF VOIP

- ✓ Find me/Follow Me  
Call Routing
- ✓ Music On Hold
- ✓ Conferencing
- ✓ Call Screening
- ✓ Auto Attendant
- ✓ Number Porting
- ✓ Call Savings
- ✓ Inter branch
- ✓ Call Recording

We supply a Wide Range of WIFI Solutions

## Long Term Evolution (LTE)

LTE stands for Long Term Evolution and is sometimes referred to as 4G LTE.

It's a standard for wireless data transmission that allows you to download your favorite music, websites, and video really fast—much faster than you could with the previous technology, 3G.

## Uncapped Business Wireless Internet

Automated Redundancy  
failover solution

Symmetrical Packages

Fast & Reliable
